

DATASHEET

# Digital Risk Protection Service

## Hunt Cyber Threats Before They Strike

Binary Defense's Digital Risk Protection service is comprised of experts formerly with the FBI, military, government and private sector; the digital risk protection services team gathers information and conducts operations to identify threats to an organization to help protect against malicious activity. We use a human-driven, technology-assisted approach to search the surface web, dark web, deep web, and social media for threat indicators against your business. Our team will provide you with actionable reporting that helps you to stay informed and prepared in the areas that matter most to you. Receive daily intelligence briefings to help stay up-to-date on the latest threats happening around the world.

## DRPS In Action

- ◆ Comprehensive intelligence gathering from
- ◆ Clearnet, Darknet, Deep web, and social media
- ◆ Adversarial activity
